# BYOD Program Enrollment Guidance

Franklin Home Power customers may enroll in the Green Mountain Power BYOD Program through FranklinWH App.

Prerequisites

The installer or homeowner selects **Green Mountain Power** as the Utility Company on the Tariff Schedule page.

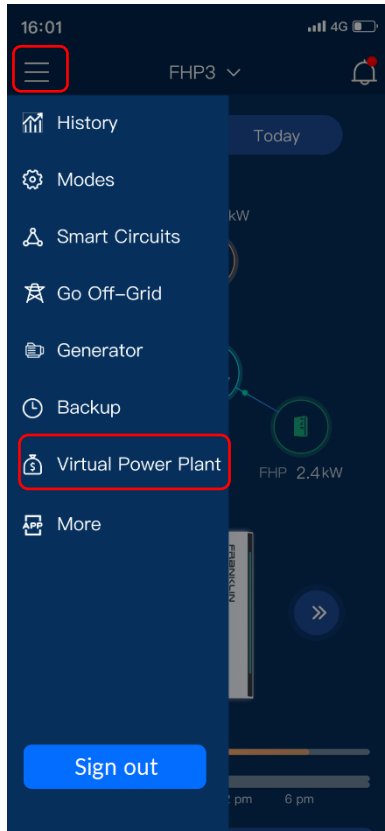

The **Virtual Power Plant** option (Step 1, next page) will appear in the menu bar on the home page.

Nov, 18, 2023

Procedure

The enrollment steps are described below.

<table>
<tr>
<td>

1. Log into the FranklinWH App on the homeowner account. Click the menu in the upper left corner.

   Click **Virtual Power Plant** to begin enrollment.

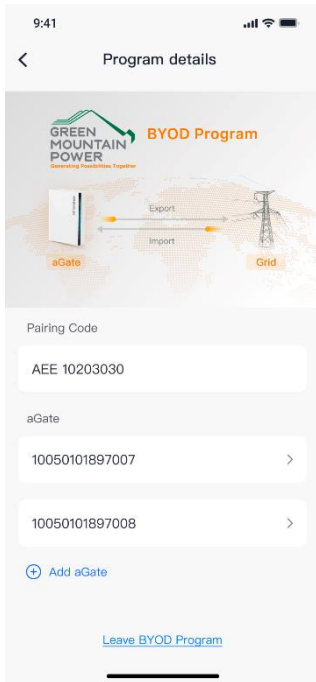

</td>
<td>

2. Click **How to get a Pairing Code** to go to the BYOD registration page. After completing the event registration and passing the review, you will receive a Pairing Code.

   You may then enter the Pairing Code and select the aGate to enroll.

</td>
</tr>
</table>

3. The Pairing Code will be shown on the page when the aGate has been successfully enrolled. You may add the aGate or remove the enrolled aGate from the list.

4. Prior to a grid event (import, export or standby), you will receive a push notification informing you of event times and power.

    Example:

    "Join the export period from [Date][Time] to [Time], power xx kW.

    Click on a registered aGate in the **Program details** page (shown in the previous step) to enter **Demand Response Events** page. Select the specific event to check the event details.

    Participation in the event is enabled by default.
